- **Location:** Online
- **Attendees:** 22 Students

The Cloud Computing and DevOps Club (CCDC) successfully organized an enriching session on 7th December 2024. This event featured **Mr. Nipun Parekh**, an esteemed alumnus of the ICT batch (2017-2021), currently serving as a DevOps Engineer at Razorpay. The session was hosted by **Ms. Rajvi Dave**, the General Secretary of the CCDC Club.

The event commenced with an engaging introduction by Mr. Parekh, who elaborated on the prevailing trends in the tech industry. He discussed the current market dynamics and highlighted the prominent tech stacks in use today. His insights offered students a comprehensive understanding of the evolving landscape in Cloud Computing and DevOps.

Following the presentation, an open-ended Q&A session provided students with an opportunity to interact directly with Mr. Parekh. Questions spanned diverse topics, including career opportunities in various job roles, the future of technology, and industry advancements. This interactive segment was highly appreciated by the attendees.

The session, which began at 10:00 AM, was well-received and concluded successfully with enthusiastic participation from students. It served as a significant platform for knowledge sharing and professional growth, making it a remarkable event for the CCDC Club.
